- x) The kitten wasn't on her window sill as usual, _____. (add a question tag)

Q.2 Read the following passage and answer the questions given below it:-

The altogether new thing in the world then was the scientific method of research, which in that period of Galileo, Kepler, Descartes, Harvey and Francis Bacon was advancing with enormous strides. All walls, all the limitations, all the certainties of the ages were in dissolution, tottering. In fact this epoch, in which we are participating still, with continually opening vistas, can be compared in magnitude and promise only to that of the 8th to the 4th millennia B.C. : of the birth of civilization in the Near East, when the inventions of food production, grain agriculture and stock breeding, released mankind from the primitive condition of foraging and so made possible an embellishment of soundly grounded communities: first villages, then towns, then cities, kingdoms, and empires. Leo Frobenius wrote of that age as the Monumental Age, and of the age now dawning as the Global:

In all previous ages, only restricted portions of the surface of the earth were known. Men looked out from the narrowest, upon a somewhat larger neighbourhood, and beyond that, a great unknown. They were all, so

Q.P. Code :00393

to say, insular: bound in. Whereas our view is confined no longer to a spot of space on the surface of this earth. It surface the whole of the planet. And this fact, this lack of horizon, is something new. It is chiefly to the scientific method of research that this release of mankind is due, and every developed individual has been freed from the once protective but now dissolved horizons of the local land, local moral code, local modes of group thought and sentiment. Not only in the sciences but in every department of life the will and courage to credit one's own sense and to honour one's own decisions, to name one's own virtues and to claim one's own vision of truth, have been the generative forces of the new age. There is a growing realization even in the moral field that all judgments are (to use Nietzsche's words) "human, all too human".

Questions:

1. What is the epoch in which we are participating still? (03)
2. In what way is it comparable to the period of the 8th to the 4th millennia B.C.? (03)
3. What is meant by the new 'lack of horizon'? (03)
4. What do you think is implied by "all the certain lies of the ages that were in dissolution' during Galileo period? (03)
5. What is the new freedom we have found, and why does it require courage? (03)
6. Give the antonyms for:- (a) primitive (b) release (02)
7. Find words in the passage that mean:- (03)
 - a) surety
 - b) searching for
 - c) limited

Q.3 Attempt any two of the following: (20)
