

(2 ½ Hours)

[Total Marks: 75]

- N.B.: 1) All questions are compulsory.  
 2) Figures to the right indicate marks.  
 3) Illustrations, in-depth answers and diagrams will be appreciated.  
 4) Mixing of sub-questions is not allowed.

**Q. 1 Attempt All (Each of 5Marks)****(15)****(a) Multiple Choice Questions****(5)**

- 1) The \_\_\_\_\_ regular expression represents any whitespace character.  
 a. \s                      b. \S                      c. \w                      d. \W
- 2) What is the last event of the page lifecycle?  
 a. Page\_Load                      b. Validate  
 c. Page\_Unload                      d. Page\_Init
- 3) Which of the following is not a part of the ConnectionString in the SqlConnection object?  
 a. Integrated Security                      b. Data Source  
 c. Connection Status                      d. Both a and b
- 4) Identify the underlying html element of LABEL control  
 a. <div>                      b. <p>                      c. <label>                      d. <span>
- 5) The most commonly used State Management technique, that is inserted at the end of URL, is \_\_\_\_\_  
 a. CrossPage Posting                      b. Session State  
 c. QueryString                      d. Cookies

**(b) Fill in the blanks with appropriate keywords by selecting the correct option from the given pool of options.****(5)**

(App\_Code, skin, decimal, Bin, Tick, UpdateProgress, Interval, double, ProgressBar)

- 1) The \_\_\_\_\_ folder in ASP.NET contains source code files that are dynamically compiled for use in your application.
- 2) The \_\_\_\_\_ datatype supports 128-bit fixed-point fractional number that supports up to 28 significant digits.
- 3) The \_\_\_\_\_ event of a Timer is triggered when the maximum number of milliseconds are elapsed.
- 4) Atleast one \_\_\_\_\_ file should be contained in the Themes folder.
- 5) The \_\_\_\_\_ control allows you to show a message when an AJAX based page is being updated.

**(c) Answer the following in 1-2 lines:****(5)**

- 1) What is MSIL?
- 2) Give the syntax of declaring a one dimensional integer array in C# and initialize its elements to 1,2,3,4,5.
- 3) Give the significance of GridView Control.
- 4) State any two LINQ data providers.
- 5) What is ViewState?

**Q. 2 Attempt the following (Any THREE) (15)**

- (a) State and explain various components of .Net framework.
- (b) Explain the working of foreach loop in C# and provide example.
- (c) Write a note on assemblies in .NET.
- (d) Explain various ASP.NET file types.
- (e) Briefly describe the Partial Classes and their syntax with a suitable example.
- (f) State and explain the important events of Global.asax file.

**Q. 3 Attempt the following (Any THREE) (15)**

- (a) Write a note on ASP.Net Page Life Cycle.
- (b) Explain at least 5 generic properties of web control.
- (c) With the help of an example, explain how data can be stored and retrieved from a session variable.
- (d) What is AdRotator? Write XML file which is created for the AdRotator Control.
- (e) Explain the SiteMapPath control in detail.
- (f) What is the use of MasterPages in ASP.NET? How a Content page can be added to a Master Page.

**Q. 4 Attempt the following (Any THREE) (15)**

- (a) Write a brief note on the Data Provider Model? Explain various ADO.NET namespaces.
- (b) Write the difference between Single-Value Data Binding and Multi-Value Data Binding in ADO.NET.
- (c) Write C# function to create an XML file given below using ASP.net:-

```
<college>
  <student id='123'>
    <name>Madhuri Talekar</name>
    <marks>44</marks>
  </student>
  <student id='123'>
    <name>Juhi Mehta</name>
    <marks>49</marks>
  </student>
</college>
```

- (d) Write a short note on Caching.
- (e) Explain the concept of Partial Refreshes with respect to AJAX in ASP.NET.
- (f) Write a short note on SqlCommand class in ADO.NET.

**Q. 5 Attempt the following (Any THREE) (15)**

- (a) Give the structure of web.config file. Also state its advantages.
- (b) Differentiate between Value Types and Reference Types.
- (c) Explain the following XML classes:
  - i. XmlTextWriter
  - ii. XmlTextReader
- (d) Explain the important properties of the BaseValidator class.
- (e) What is LINQ? Explain the syntax of LINQ giving suitable examples.
